re: Harry Adelson, ND

To Whom It May Concern:

I am writing this letter on behalf of Harry Adelson. I am boarded in Family Practice and Sports Medicine and have been practicing Regenerative Medicine since 2007. I teach at national conferences on the topic and am exposed to many physicians throughout the country and world. Therefore, I have a good idea of quality when I see it. I've known Harry for around eight years and have found him to be one of those quality physicians who practice exceptional medicine. He has been nothing short of professional. Over the years, I have sent many patients to Harry in consultation for spine problems. All of these patients were treated extremely well and were very pleased with their care. That's why I continue to consult Harry. When it comes to seeking treatment for myself, I only want the best. That's why I have seen Harry for Bone Marrow treatments and a potential spine problem. In my opinion, Harry practices high quality outstanding medicine.

If you have any questions, please do not hesitate to call.

Sincerely,

Joseph J. Albano, MD
