

**SCNM** SOUTHWEST COLLEGE OF  
NATUROPATHIC MEDICINE  
& HEALTH SCIENCES  
**PAIN RELIEF CENTER**

To Whom It May Concern;

I am the medical director of the Southwest College of Naturopathic Medicine's Pain Relief Center (PRC) in Tempe, Arizona. I am also the chief of the medical staff at Arizona Spine and Joint hospital in Mesa, AZ. I have known Harry Adelson, N.D. for ten years. In the past few years, I have observed Dr. Adelson performing autologous stem cell procedures at my PRC. I have also directly observed Dr. Adelson perform these procedures in his own private clinic in Park City, Utah. I have directly observed him perform bone marrow aspiration, lipo-aspiration, and the subsequent stem cell preparation from both, as well as the following fluoroscopically-guided injections of stem cells preparations; intervertebral disc injection, lumbar and cervical epidural intralaminar and lumbar transforaminal injections, facet and peri-facet injections, joint injection, and finally ultrasound-guided ligament/tendon and joint injection. He is very comfortable with all these procedures and more importantly he understands both why and how to do them properly. Naturopathic licensure laws in both Utah and Arizona provide Naturopathic Physicians the scope of practice to allow them to perform the above-listed procedures. Further, Dr. Adelson displays perfect competence in performing these procedures. My own background is Allopathic medical school, 2 years of surgical residency, a full anesthesiologist residency with a final year of interventional pain management training, private practice of interventional pain, anesthesiology and surgical procedures from 1991 through 2016. I have been at the Southwest College of Naturopathic medicine since January of 2015 initially leasing space but becoming an employee and the director of the PRC in January of 2016. Thank you very much for your consideration.

Sincerely,

Klee S. Bethel, M.D.
