November 10, 2017

To whom it may concern:

I had the pleasure of observing Dr. Adelson recently in his office and in procedures. As a Johns Hopkins spine fellowship-trained neurosurgeon, I was impressed with his technical abilities and patient successes with a range of degenerative conditions.

I visited Dr. Adelson so as to learn from one who is regarded an experienced leader in his field. I have an interest myself in learning stem cell spinal treatments, and what I observed in Docere Clinics was a high standard of procedural proficiency, sterility, and safety.

I would recommend Dr. Adelson and his compassionate and effective team to anyone investigating regenerative treatments.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Madera'.

Marcella Madera
