Pain Management

Board Certified in
Physical Therapy

November 07, 2017

To Whom It May Concern:

I am Dr. Edward Magaziner, a Board-Certified Physician in Physical Medicine and Rehabilitation, with a subspecialty Board Certification in Pain Medicine. I am a practicing Interventional Pain Physician and Physiatrist who has also been specializing in the field of regenerative medicine for over 20 years.

I have been asked to write a letter of support for Dr. Harry Adelson a Naturopathic Physician who is practicing in Park City, Utah.

I have known, Dr. Adelson on a professional level for approximately 10 years. I have found him to be a well-respected physician by many medical physicians and surgeons in the field of regenerative medicine, and I have observed him on many occasions lecturing at our National Society Meetings on the topic, and performing as an instructor there as well on regenerative medicine techniques to dozens of other medical physicians, surgeons and osteopaths. He has also performed and presented research on his cases.

I had the opportunity to observe Dr. Adelson in his Utah office performing joint, tendon, spinal injections, bone marrow aspiration, and manual liposuction techniques. I have found his skills of injection technique, the use of fluoroscopy and ultrasound to be very competent. We have also discussed on numerous occasions, difficult patient scenarios, and I have found his medical knowledge and judgment to be equal or better than most of the medical physicians performing these procedures.

Sincerely yours,

Edward S. Magaziner, M.D.
